EXP.NO: 2	Write JavaScript Programme to validate the following fields of the HTML Registration page.
DATE: 30/01/2026	

AIM:

To write JavaScript code to validate user input in a registration form. The validation will ensure that the data entered by the user meets specific criteria for each field. This will help in maintaining data integrity and prevent invalid submissions.

ALGORITHM:

1. Input:

- The user fills in the following fields: **First Name**, **Password**, **E-mail**, **Mobile Number**, **Last Name**, and **Address**.

2. Validation Steps:

1. **Validate First Name:**
    - Check if the first name contains **only alphabets**.
    - Ensure the length of the **First Name** is **at least 6 characters**.
    - If any of these conditions fail, display an error message indicating the required input.
2. **Validate Password:**
    - Check if the password is **at least 6 characters long**.
    - If it is less than 6 characters, display an error message.
3. **Validate E-mail:**
    - Use a **regular expression** to check if the email follows the standard pattern: name@domain.com.
    - Ensure that the email contains **no invalid characters** and matches the required pattern.
    - If it doesn't match, display an error message indicating an invalid email format.
4. **Validate Mobile Number:**

- Check if the mobile number contains **exactly 10 digits**.
- Ensure there are **no alphabets or special characters**.
- If the number is invalid, display an error message indicating the correct format.

5. **Validate Last Name:**
   - Ensure the **Last Name** field is **not empty**.
   - If it is empty, display an error message.
6. **Validate Address:**
   - Ensure the **Address** field is **not empty**.
   - If it is empty, display an error message.

CODE:

index.html

```
<!DOCTYPE html>
<html>
<head>
    <title>Registration Form</title>
    <link rel="stylesheet" href="style.css">
    <script src="validate.js"></script>
</head>

<body>
<div class="container">

    <!-- Left Side Image -->
    <div class="left-section">
        <img src="register.jpg" alt="Register Image">
    </div>

    <!-- Right Side Form -->
    <div class="right-section">
        <h1>Registration Form</h1>

        <form name="regForm" onsubmit="return validateForm()">

            <div class="row">
                <div>
                    <label>First Name:</label>
                    <input type="text" name="fname">
                </div>

                <div>
                    <label>Last Name:</label>
                    <input type="text" name="lname">
                </div>
            </div>
```

```
            <label>Password:</label>
            <input type="password" name="password">

            <label>Email ID:</label>
            <input type="text" name="email">

            <label>Mobile Number:</label>
            <input type="text" name="mobile">

            <label>Semester:</label>
            <select>
              <option>-- Select Semester --</option>
              <option>1</option>
              <option>2</option>
              <option>3</option>
              <option>4</option>
            </select>

            <label>Address:</label>
            <textarea name="address"></textarea>

            <div class="buttons">
              <button type="submit">Register</button>
              <button type="reset">Cancel</button>
            </div>

          </form>
        </div>
      </div>
      </body>
      </html>
```

Styles.css

```
      body {
        font-family: Arial;
        background: linear-gradient(to right, #66e0d1, #9fa8da);
      }

      .container {
        width: 90%;
        margin: 50px auto;
        display: flex;
        background: #f5f5f5;
        border-radius: 15px;
        padding: 20px;
      }

      .left-section img {
        width: 550px;
        height: 500px;
      }

      .right-section {
        width: 100%;
```

```
        padding: 20px;
    }

    h1 {
        text-align: center;
        color: #4a90e2;
    }

    input, select, textarea {
        width: 100%;
        padding: 10px;
        margin: 10px 0;
    }

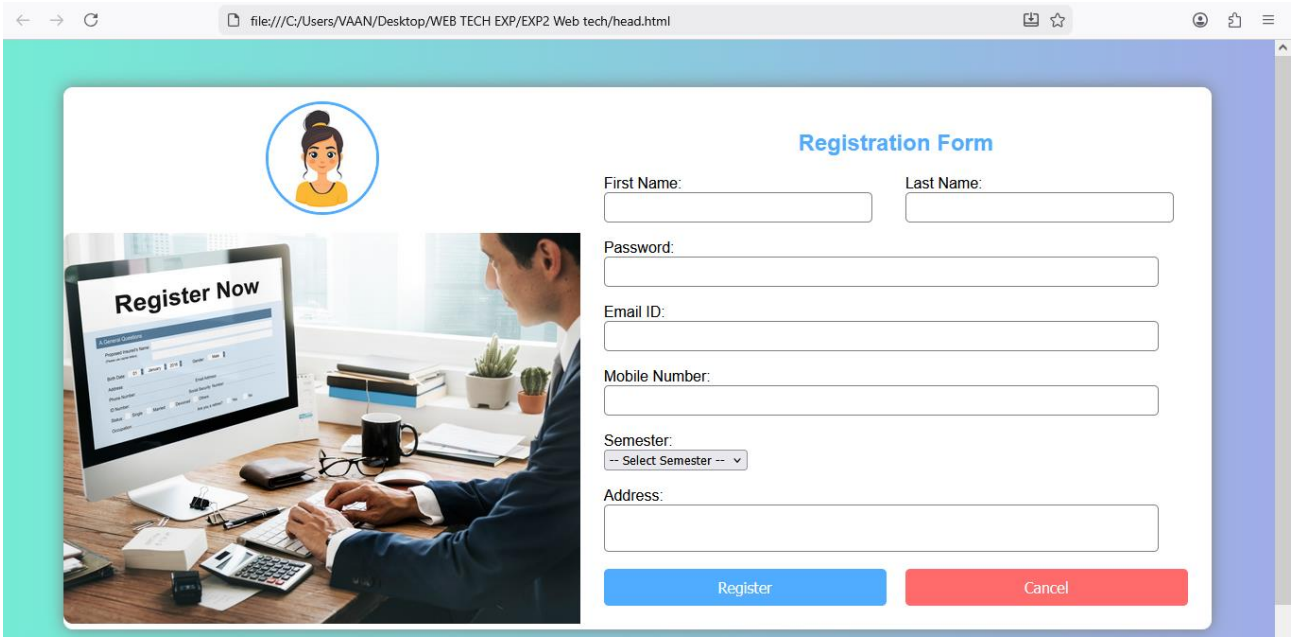
    .row {
        display: flex;
        gap: 20px;
    }

    .buttons {
        display: flex;
        gap: 20px;
    }

    button {
        width: 50%;
        padding: 10px;
        background: #4a90e2;
        color: white;
        border: none;
    }

    button[type="reset"] {
        background: red;
}
```

Output:



RESULT:

HTML page with Form is created and is validated using Javascript
